RE:

To Whom It May Concern:

We certify that our Kingston quarry, is fully permitted and authorized to operate as a commercial mine pursuant to the New Jersey Mine Safety Act, N.J.S.A. 34:6-98.1 et seq., and the regulations promulgated thereunder at N.J.A.C. 12:185.1 et seq. and that our crushed stone products are produced only from undisturbed geologic formations of virgin, hard, durable, diabase trap rock stone, and are not commingled with any other materials; that said stone is not located on or impacted by any contaminated sources, adversely impacted by discharges of hazardous materials or chemical application or known or suspected of being contaminated; and is not affected by conditions or processes that would introduce contaminants into the materials at concentrations above regulatory concern or that would increase the concentrations of contaminants already present to concentrations above regulatory concern. Trap Rock Industries LLC is supplying this certification for informational purposes only. This certification shall not be used or relied upon for any other purposes, including any claims, demands or actions seeking indemnification against Trap Rock related in any manner related to the use or distribution of Trap Rock Industries LLC's products. The Kingston quarry is located in Franklin Township, Somerset County, Block 5.02, Lot 1.02.

Please do not hesitate to contact us should you need further assistance.
